

SUPERFAN

**INTERACTIVE
EXPERIENCE**

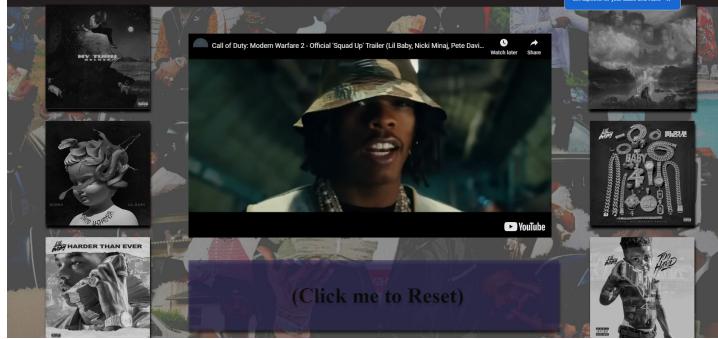

BRAINSTORM

come up with three different ideas of themes + interactive features

Idea 1: WWII

Theme

a website with WWII themed decor and links and articles giving information about important events about the war. The front would be a short video about something to do with world war two

Interactive JS Feature #1

If you hover over an image it pops up

Interactive JS Feature #2

When you click on a image it plays a video or pulls something up

Idea 2: Multiverse Spiderman website

Theme

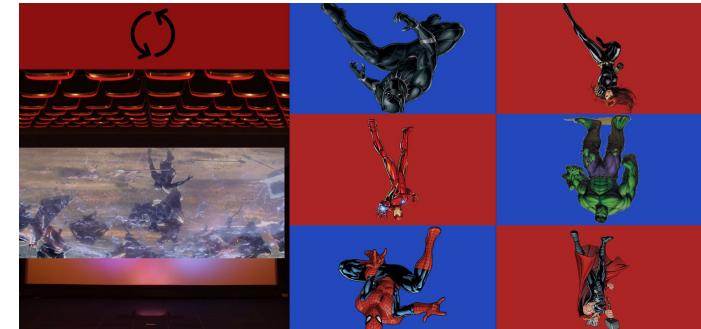

A colorful website that includes picture of multiple spider people and if you click on them they play a video on the specific character. And it may also open a bio for that character

Interactive JS Feature #2

Interactive JS Feature #1

Your explanation here... The pictures pop up when you hover over them

clicking the image will open a video

Idea 3:

Theme

Your explanation + photos here...

Interactive JS Feature #1

Your explanation here...

Interactive JS Feature #2

Your explanation here...

EVALUATE

think about the good and bad for each idea then choose one

Pros/Cons of Each Idea:

	Pros	Cons
Idea 1: WWII	Interested in what that theme would look like Many interesting events to feature	
Idea 2: Spiderman	Lots of designs possible Lots of creativity to explore	
Idea 3:		

CONTENT

gather and edit essential content for your site

PIXLR®

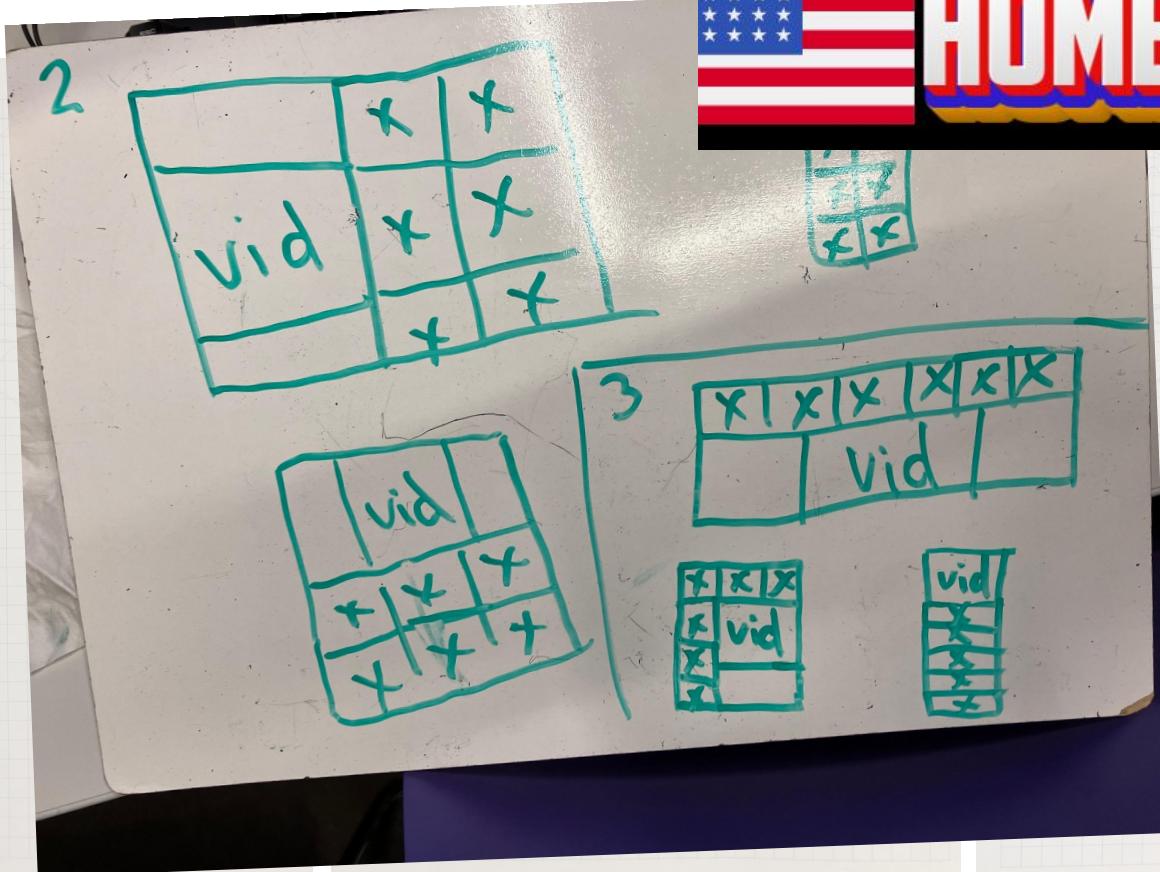

*Include screenshots here, but make sure you save images on your computer
or in your Google Drive!*

*You want to see the exact shapes of your images before you create a
detailed annotated plan!*

DESIGN

create three possible responsive designs for your chosen idea

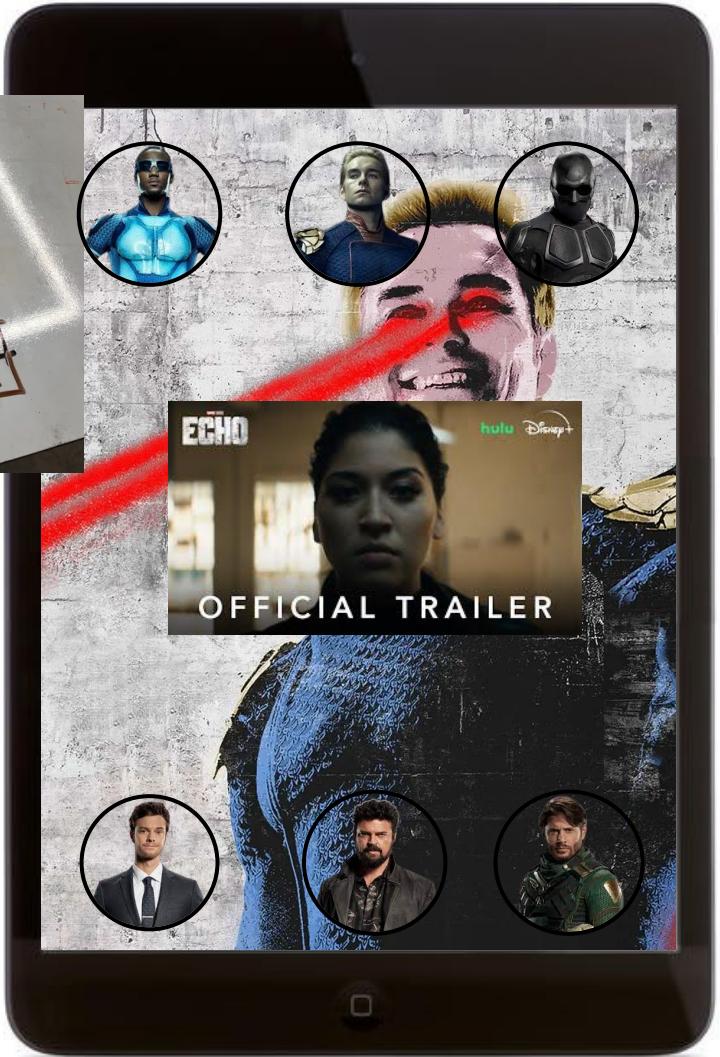

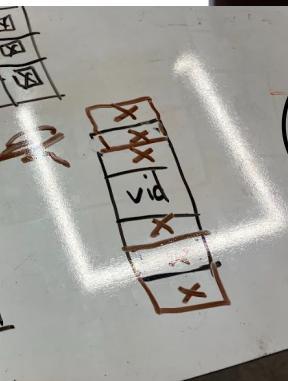

Making this logo gave me the idea to do the boys and I just ran with it because of the artstyle

MOCKUP

choose your final layout and create a digital mockup

ANNOTATE

add explanations, colors, percentages, and display properties + draw your dom

Forgot to take
pic of dom :(

BUILD

create your desktop divs using html and css then make it responsive

```
<body>
  <div class="blue sides">
    <div class="imagediv center-content">
      
    </div>
    <div class="imagediv center-content">
      
    </div>
    <div class="imagediv center-content">
      
    </div>
  </div>

  <div class="middle">
    <div class="yellow centerdivs"></div>

    <div class="red viddiv center-content">
      
    </div>
  </div>
```

```
body {
  width: 100vw;
  height: 100vh;
  margin: 0;
  display: flex;
  background-color: black;
}

.sides {
  height: 100%;
  width: 25%;
  display: block;
}

.middle {
  height: 100%;
  width: 100%;
  display: block;
}

.centerdivs {
  height: 25%;
  width: 100%;
}

.viddiv {
  height: 50%;
  width: 100%;
}
```

CONTENT

insert all images and text into your site

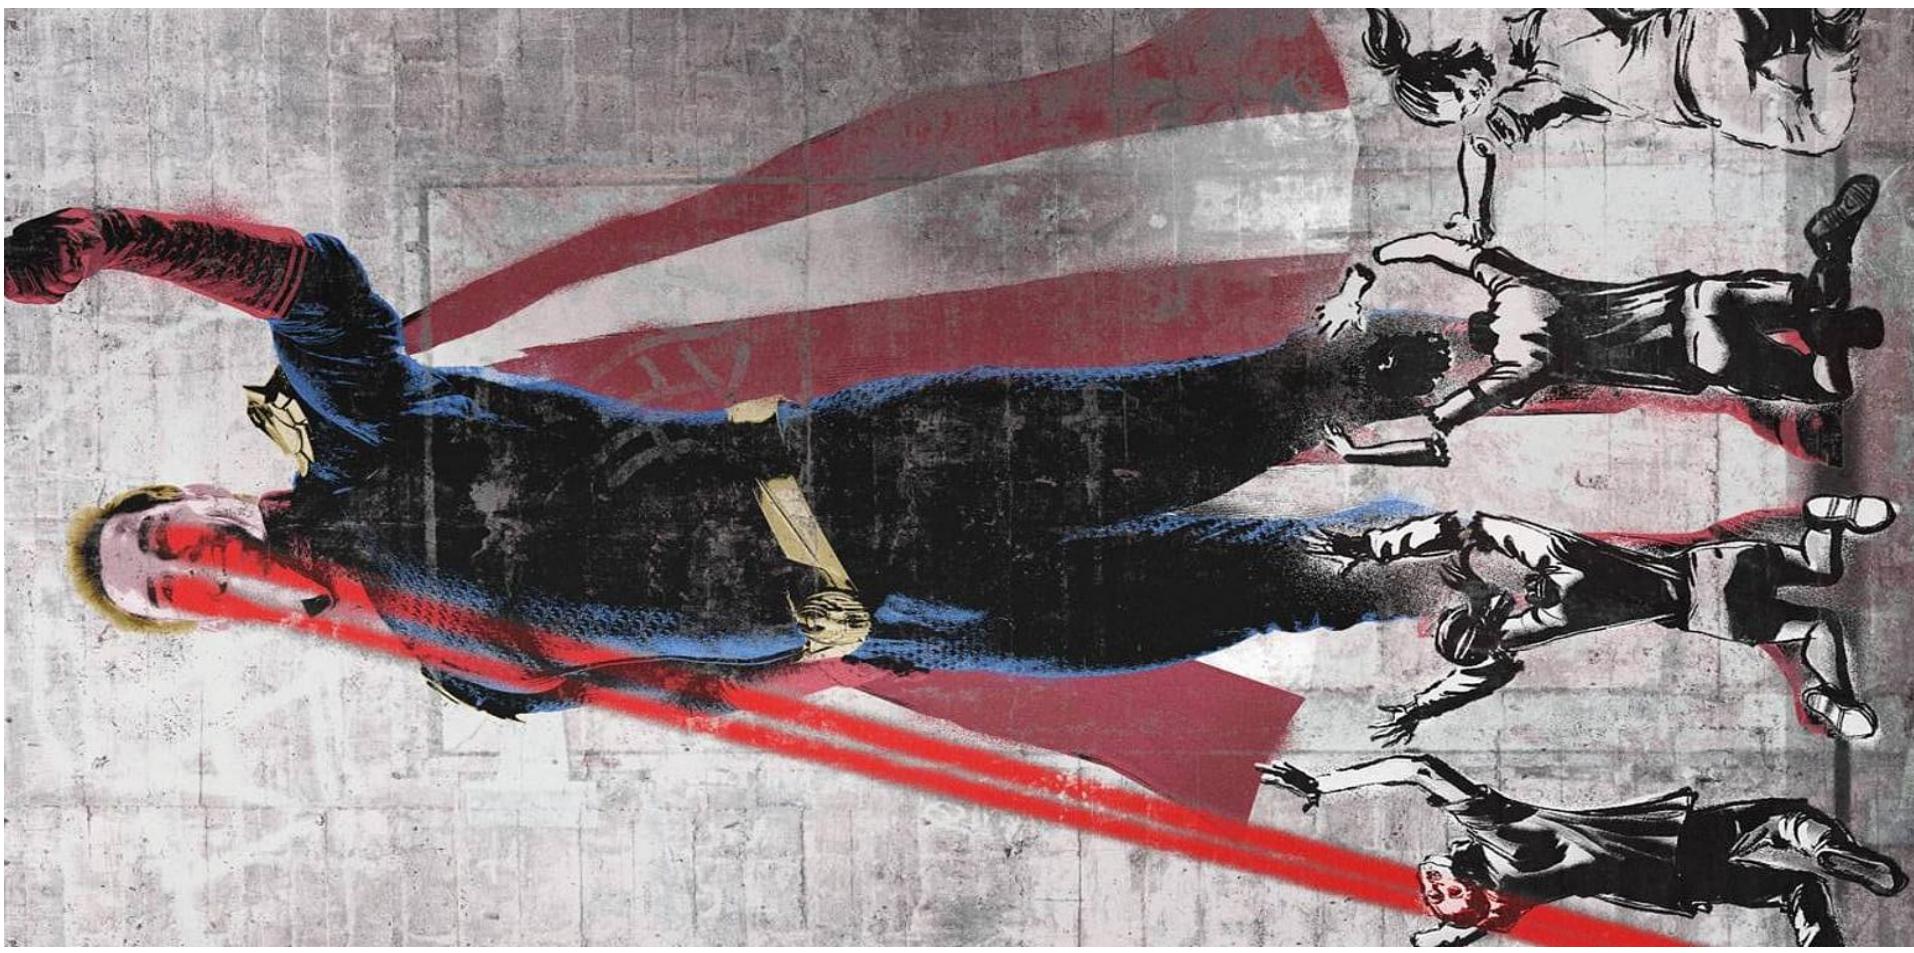

HTML

CSS

JAVASCRIPT

add behavior to your page by inserting two pieces of javascript

```
function homelander() {  
    stopSounds();  
    document.getElementById("b2").classList.remove("selected");  
    document.getElementById("b3").classList.remove("selected");  
    document.getElementById("b4").classList.remove("selected");  
    document.getElementById("b5").classList.remove("selected");  
    document.getElementById("b6").classList.remove("selected");  
    document.getElementById("b1").classList.add("selected");  
    document.getElementById("videoFrame").src =  
        "https://www.youtube.com/embed/YR9bpAdUiVs?si=g6VCIq5zGgbhd-c";  
    document.getElementById("h1").play();  
}
```

dscape reclaimed by
fe and competition

erce and well adapted

ENHANCE UX

add in effects when the user hovers and clicks to make the page intuitive and fun

```
function homelander() {
    stopSounds();
    document.getElementById("b2").classList.remove("selected");
    document.getElementById("b3").classList.remove("selected");
    document.getElementById("b4").classList.remove("selected");
    document.getElementById("b5").classList.remove("selected");
    document.getElementById("b6").classList.remove("selected");
    document.getElementById("b1").classList.add("selected");
    document.getElementById("videoFrame").src =
        "https://www.youtube.com/embed/YR9bpAdUiVs?si=g6VCIq5zGgbhdh-c";
    document.getElementById("h1").play();
}
```

TEST + ITERATE

get feedback from users then make revisions to your user interface

UX Testing + UI Iteration

User Interface: How could the styling of elements be changed to make a more visually appealing, clear, and space efficient layout? (ex: sizes, colors, fonts, alignment, etc.)		User Experience: What elements of the user experience could be improved to make the puzzle more fun/satisfying? (ex: sounds, hover effects, etc.)
User 1 Name: Bailey Delane	<ul style="list-style-type: none">The video size is kinda off. The height could be changedThe sizes for fonts and images overall are goodThe alignment looks fine	<ul style="list-style-type: none">Maybe add other characters or a button that sends you to a websiteThe hover effects are as fineThe sound effects are enjoyable, maybe add a sound effect to the title
User 2 Name: Favio Jimminez	<ul style="list-style-type: none">Visually it's fine it looks it looks pleasingOverall it all matches wellThe video should be less wide and more taller	<ul style="list-style-type: none">The stuff took a long time to loadYou could make the cursor change when it hovers over an imageYou should make the sound cut off
User 3 Name: Clint Maska	<ul style="list-style-type: none">When you click on someone what if they stay highlightedReset button on the websiteMake video bigger	<ul style="list-style-type: none">The button are appealingHover effect are also goodMake it so that the audio doesn't overlap
User 4 Name: Jacob Davis	<ul style="list-style-type: none">Make the people outlines bolderTurn the mouse into a finger	<ul style="list-style-type: none">They're loud, but you can just change the volumeMake the video smaller so that it doesn't cover up the backgroundMake the audio slower so that they sound differently
User 5 Name: Julian Balsells	<ul style="list-style-type: none">Looks coolThe alignment is goodThe video is kinda small	<ul style="list-style-type: none">Make the audio not overlapMake a click animation
